

Colours and choice of finish

Choose your VEDOC colour from one of the following standard ranges:

- VEDOC VP H-Q colour card
- VEDOC VX General purpose exterior colour card
- VEDOC VEP General purpose interior colour card

Within these ranges VEDOC offer clear powders for decoration or where additional protection is required, solid colours, pearl and metallic colours and fluorescent interior colours.

Special colour requirements.

If your colour cannot be identified from the standard Ferro VEDOC colour cards above, a special colour will be formulated in colour and gloss level, to match your supplied sample.

VEDOC also manufacture colours to the RAL, SABS, BS and Pantone colour specifications.

- Select your VEDOC powder finish.
- Smooth – a standard finish in 3 gloss levels, gloss 80-100, satin 40-80 and matt 0-40
- Ferrotex - an excellent textured finish for masking any substrate irregularities or surface imperfections.
- Ferrograin - a fine sandpaper effect
- Hammer - a hammertone finish
- Speckled finish - best described as a spotted appearance
